

## Relay Training Plan 3 days/week for 8 weeks

Prepare for your training by building on your base level of fitness: First, buy great-fitting running shoes. Then, start walking, jogging, or running 20-60 minutes at least 3 days per week. Next, find ways you can cross-train (see Legend below for examples). The best way to 'stick with it' is to find a partner, running club, or a team of 10 to train with! Warm up before your run with dynamic exercises and be sure to stretch afterwards.

*Happy Training - and have a great race!*

### Legend

**Run/Walk** Whether you run or walk, emphasize good form and accomplishment of the distance, as pace is not as important on these days.

**XT** Cross-training can be biking, elliptical, rowing, swimming, stairs, yoga, pilates classes, plyometrics - anything EXCEPT running.

**Strength** Variable resistance machines, free or fixed weights, resistance bands, dumbbells, Bosu balls, etc.

**Core** Exercises designed to work the abdominal and lower back muscles like sit-ups, planks, yoga or pilates.

**Tempo** Run 30-45 seconds faster per mile than your race pace goal.

**Neg Splits** Run the 2nd half of the mileage faster than the first half to improve strength, edurance and speed for your final kick.

**Massage** Full head-to-toe massage.

**LSD** Long Slow Distance: the goal of LSD runs are to log time on your feet. Go slow and take walk breaks, as needed.

**Back-down** Mileage sometimes decreases from the previous week to allow time for adequate recovery.

**Hills** Choose a route that has some hills to increase your stamina and speed.
